

Matching OE Quality

Developed to perfection. Zero compromises in quality.

EXPERIENCE THE REAL DIFFERENCE

Boost your business with **the revolutionary Turbo from Nissens**

Easy installation
Important parts included in the box (First Fit product)

Full compatibility
Smooth fitting to the vehicle systems and the engine's layout

Excellent performance
Proper engine boost producing excellent power output

Matching fuel economy
Same consumption level as the original turbo application

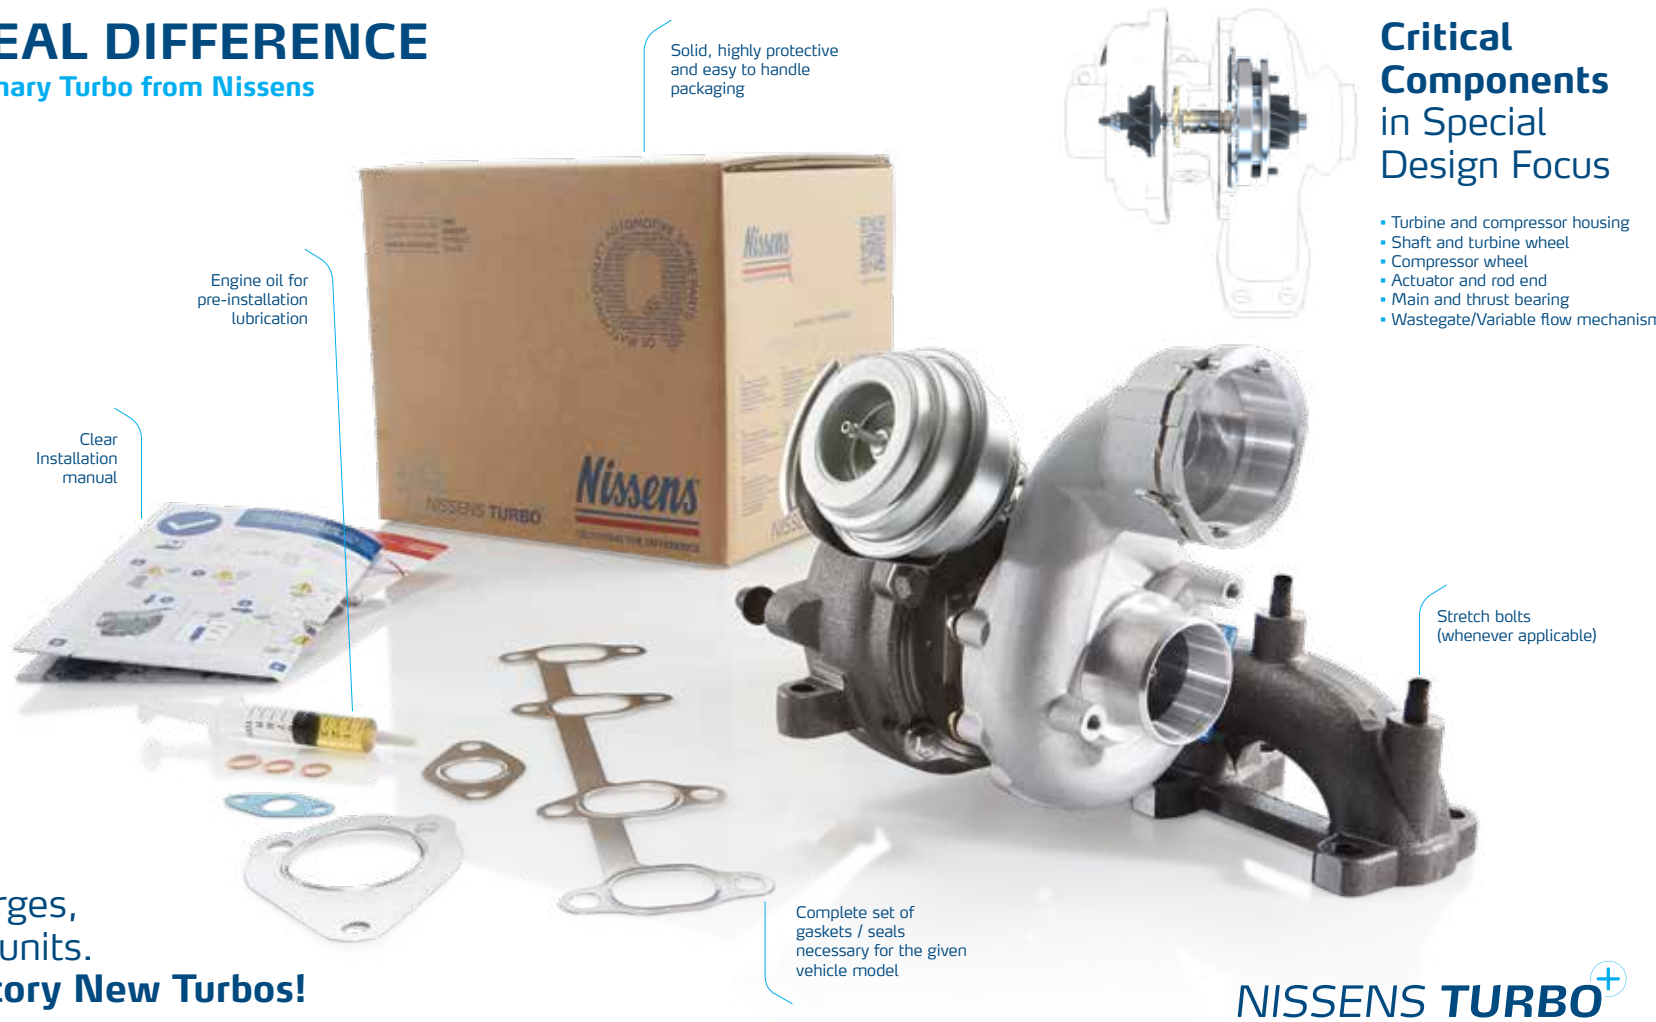

Proper emissions performance
Fully conforming with the EC (European Commission) emission norms for exhaust

Supreme durability
Designed and manufactured to match the engine's life-span

No fees, no charges, no return of old units.
Complete, Factory New Turbos!

Critical Components in Special Design Focus

- Turbine and compressor housing
- Shaft and turbine wheel
- Compressor wheel
- Actuator and rod end
- Main and thrust bearing
- Wastegate/Variable flow mechanism

NISSENS TURBO+

Comprehensively Tested

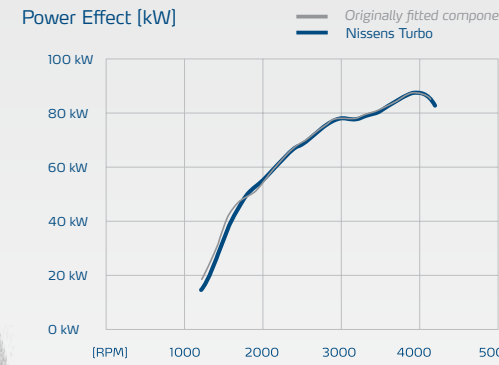

In-house Test Center & External Institutes

Efficient, Reliable, Safe

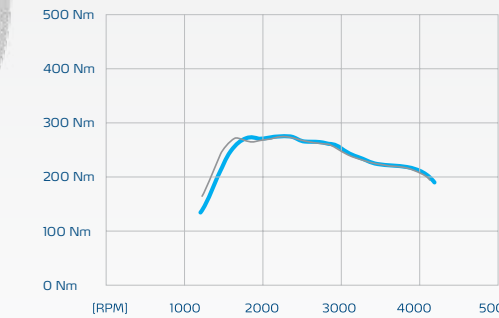

ADVANCED TEST SERIES INCLUDING

- Durability and performance
- Field test
- Exhaust emissions acc. EC norms
- Engine power output
- Fuel economy

Engine Power Output Test

Low-end torque effect [Nm]

The above results concern Nissens turbo no. 93171 and originally fitted turbo tested on a very popular vehicle application: VW Passat 1,9 TDI. The test was carried out by the independent German Institute TÜV Nord.
